

FlowZone

Test Data Framework & Sample Persona #1: Marcus Cole

Version 1.0 | System Architecture Test Data
Prepared for RAG Pipeline, Truth Engine, and Character Assignment Testing

PART 1: THE FRAMEWORK

1. Framework Overview

This framework defines every category of data that FlowZone processes, where it lives, who creates it, how often it updates, and what the system extracts from it. The framework is designed to test all three RAG systems, the Truth Engine reconciliation logic, the character assignment matrix, and the gamification engine.

Design Principle: Every piece of test data should serve at least two purposes — testing a data pipeline AND creating a realistic scenario that triggers specific system behaviors (character switches, mask detection, Safe Harbor protocols, etc.).

1.1 The Three Data Zones

Zone	Location	Persistence	Privacy Level	Update Frequency
Zone 1: User Documents	User’s Google Drive	Permanent (user-owned)	Highest — embeddings + metadata stored, raw text never persisted	Infrequent — new documents added as events occur
Zone 2: System Data	Your PostgreSQL + ChromaDB	Permanent (server-owned)	Medium — structured data, anonymized patterns	Continuous — updated every session
Zone 3: Real-Time Input	In-memory during session	Stored as structured logs post-session	Tiered (Green/Yellow/Red Safe Harbor)	Every interaction

2. Zone 1: User Google Drive Documents

Each user has 10–15 documents in their Google Drive that FlowZone can access. These fall into five document categories. For each category, we define: the document type, what a realistic example looks like, what structured metadata the system extracts, what gets embedded in ChromaDB, and what triggers retrieval.

2.1 Court / Legal Documents

Present for: Juvenile justice users only (2 of 5 test personas)

Typical documents: Disposition orders, probation conditions, court hearing schedules, violation notices

Metadata Extraction Schema

Field	Type	Example	Purpose
document_type	enum	disposition_order probation_conditions hearing_schedule violation_notice	Route to correct processing pipeline
case_number	string	JV-2025-00847	Link documents to same case
court_jurisdiction	string	Shelby County Juvenile Court	Jurisdiction-specific legal RAG
judge_name	string	Hon. Patricia Dawkins	Track consistency across hearings
dates.issued	date	2025-01-15	Timeline reconstruction
dates.next_hearing	date	2025-04-22	Proactive alerts to characters
conditions	array[string]	["curfew_9pm", "weekly_checkin", "drug_testing_random", "school_attendance_mandatory"]	Truth Engine comparison with self-report
violations	array[object]	[{"type": "curfew", "date": "2025-02-10", "consequence": "warning"}]	Escalation tracking
risk_level	enum	low medium high	Urgency weighting for character responses

RAG Trigger: When a user mentions “my PO,” “court,” “curfew,” or “hearing,” the system retrieves their court/legal document chunks + relevant legal rights info from the global knowledge base.

2.2 School Records

Present for: All users (5 of 5 test personas)

Typical documents: Report cards, IEPs (Individualized Education Programs), disciplinary records, attendance summaries

Metadata Extraction Schema

Field	Type	Example	Purpose
document_type	enum	report_card iep disciplinary_record attendance_summary	Processing routing
school_name	string	Westwood Middle School	Context for character conversations
academic_period	string	Fall 2024 Semester	Time-based trend analysis
gpa	float	1.8	Truth Engine — compare with self-reported “doing fine”
attendance_rate	float	0.68	Mask Detection trigger if claims “always there”
classes_failing	array[string]	["English 9", "Algebra I"]	Specificity for Straight Shooter advice
disciplinary_incidents	array[object]	[{"date": "2025-02-01", "type": "fight", "consequence": "3_day_suspension"}]	Pattern detection across time
iep_status	boolean	true	Legal rights RAG — IEP students have specific protections
iep_accommodations	array[string]	["extended_test_time", "preferential_seating", "behavior_plan"]	Navigator can reference specific supports
counselor_notes	string	Student shows improvement in peer interactions but struggles with authority figures	Truth Engine adult perspective

2.3 Case Worker / PO Reports

Present for: Juvenile justice users (2 of 5), plus 1 at-risk user with a school-assigned social worker

Typical documents: Monthly check-in reports, home visit summaries, risk assessment forms, progress notes

Metadata Extraction Schema

Field	Type	Example	Purpose
report_type	enum	monthly_checkin home_visit risk_assessment progress_note	Processing routing
author_role	enum	probation_officer social_worker case_manager	Weight in Truth Engine

Field	Type	Example	Purpose
report_date	date	2025-03-01	Recency weighting
compliance_rating	enum	compliant partial non_compliant	Direct Truth Engine input
concerns_flagged	array[string]	["peer_associations", "substance_use_suspected", "home_instability"]	Trap correlation with user self-report
strengths_noted	array[string]	["employment_maintained", "positive_attitude_in_sessions"]	Strategist builds on these
recommendations	array[string]	["increase_check_in_frequency", "refer_to_anger_management"]	Navigator intervention selection
home_environment	object	{ "stability": "unstable", "primary_caregiver": "grandmother", "concerns": ["overcrowding"] }	Context for character empathy

2.4 Parent / Guardian Communications

Present for: All users (5 of 5 test personas)

Typical documents: Emails to/from school, messages to case workers, written complaints, advocacy letters

Metadata Extraction Schema

Field	Type	Example	Purpose
communication_type	enum	email letter formal_complaint advocacy_request	Tone calibration
author	string	Ms. Denise Cole (grandmother/guardian)	Relationship mapping
recipient_role	enum	school_admin probation_officer judge therapist	Context for power dynamics
date	date	2025-02-20	Timeline placement
tone_assessment	enum	supportive frustrated adversarial desperate	Truth Engine — adult emotional state
key_claims	array[string]	["school_not_following_iep", "son_is_trying_hard", "system_is_unfair"]	Cross-reference with school data
requests_made	array[string]	["meeting_with_principal", "iep_review", "schedule_change"]	Action items for Navigator

Sanitization Required: Parent communications often contain emotional language, insults about the youth, or labels (“he’s just lazy”). The AI sanitization pass strips these before the characters ever see them, keeping only tactical facts.

2.5 Medical / Mental Health Records

Present for: 3 of 5 test personas (varying levels — one with ADHD diagnosis, one with trauma history, one with no records)

Typical documents: Diagnostic evaluations, medication records, therapy progress notes, crisis intervention reports

Metadata Extraction Schema

Field	Type	Example	Purpose
record_type	enum	diagnostic_eval medication_record therapy_progress crisis_report	Processing routing
diagnoses	array[string]	["ADHD_combined", "PTSD"]	Character tone adjustment — Navigator uses trauma-informed language
medications	array[object]	[{"name": "methylphenidate", "dose": "20mg", "frequency": "daily", "compliance": "inconsistent"}]	Context but NEVER dispensed as advice
therapy_type	string	CBT + trauma-focused	RAG System 1 alignment — pull matching techniques
therapy_frequency	string	Weekly (Wednesdays 3pm)	Scheduling context
crisis_history	array[object]	[{"date": "2024-11-15", "type": "self_harm_ideation", "intervention": "crisis_counselor_called"}]	Safe Harbor Red protocol trigger
risk_factors	array[string]	["family_instability", "peer_rejection", "academic_failure"]	Cross-reference with user traps

CRITICAL SAFETY: Medical/mental health data triggers the highest privacy protections. Crisis history automatically sets the Safe Harbor floor to Yellow (never Green). Any mention of self-harm ideation in current conversation immediately escalates to Red.

3. Zone 2: System-Managed Data

This data lives on your server. It's created by mentors, pulled from school APIs, calculated by the trust score engine, or derived from session analysis. This is NOT in the user's Google Drive.

3.1 Mentor Dashboard Input

Data Point	Input Method	Example	Used By
Mentor observation notes	Free-text input on dashboard	"Marcus was quiet today. Seemed distracted. Mentioned problems at home but wouldn't elaborate."	Truth Engine (after AI sanitization)
Vouch points (manual award)	Button click + reason	+15 points: "Showed up voluntarily on a Saturday"	Trust Score Engine
Risk flag	Toggle + note	Yellow flag: "Noticed bruising on arms, said it was basketball"	Safe Harbor escalation
Goal progress update	Structured form	Goal: "Attend school 4/5 days" — Status: 3/5 this week	Strategist context

3.2 School API Data (Automated)

Data Point	Sync Frequency	Source	Format
GPA (current)	Weekly	School SIS API	Float (0.0–4.0)
Attendance rate	Daily	School SIS API	Float (0.0–1.0)
Tardiness count	Daily	School SIS API	Integer
Disciplinary events	As they occur	School SIS API	Object with date, type, consequence
Grade changes	Weekly	School SIS API	Array of {subject, old_grade, new_grade}

3.3 Trust Score Components (Calculated)

These are computed by the system after every session, based on the Shield Formula. Each component is stored per-user per-day in the trust_scores table.

Component	Calculation	Range	Test Scenario Needed
C (Consistency)	Count of consecutive daily check-ins	0–365	User with a 14-day streak vs. user who just started

Component	Calculation	Range	Test Scenario Needed
W (Weight)	Multiplier for checking in on “Hard Days” (angry/storm vibe)	1.0–2.0	User checks in while vibe = ☹️, gets 1.5x
H (Honesty Bonus)	Points for proactively disclosing a Trap	0 or +25 per disclosure	User admits to a violation before PO reports it
R (Regulation Bonus)	Points for completing Tactical Resets (breathing exercises)	0–10 per session	User completes 60-second breathing when prompted
M (Mentor Vouch)	Manually awarded by mentor	0–50 per vouch	Mentor gives +15 for showing up voluntarily
P (Penalty)	Deducted for detected lies or masking	-10 to -50 per incident	User selects ☹️ but text sentiment is 😊
T (Time)	Days since first check-in (denominator)	1+	Score normalizes over time, not erased by bad days

3.4 Session Logs & Extracted Patterns

After every FlowQuest session, the system runs a background extraction that produces structured pattern data. This feeds RAG System 3 (cross-user patterns).

Session Log Schema

Field	Type	Example
session_id	uuid	a3f8c2e1-...
user_id	uuid	user_marcus_001
session_date	date	2025-03-10
duration_minutes	integer	12
vibe_selected	enum	☹️ (Angry)
vibe_detected_by_sentiment	enum	☹️ (Angry)
mask_detected	boolean	false (vibes match)
character_active	string	challenger
traps_mentioned	array[string]	["peer_pressure", "home_conflict"]
interventions_offered	array[string]	["DBT_opposite_action", "breathing_exercise"]
interventions_completed	array[string]	["breathing_exercise"]
honesty_disclosures	integer	1

Field	Type	Example
trust_score_delta	float	+3.2
safe_harbor_level	enum	green

4. Zone 3: Real-Time User Input

This is what the user provides during each interaction — the Strategic Intake (once), and FlowQuest sessions (daily).

4.1 Strategic Intake (One-Time, 5 Questions)

The intake answers determine the Baseline Trust Score and initial character assignment. Here's the full scoring and assignment logic:

Question	Answer Options	Scoring Logic	Character Signal
Q1: Intent Check "Are you here to win your freedom or check a box?"	A) Win my freedom B) Check a box	A: +10 (likely compliance mask) B: +50 (honesty bonus)	B → Challenger (break the mask) A → depends on other answers
Q2: Pressure Gauge Heat level 1–10	Scale: 1–10	8–10: 1.5x Weight multiplier 5–7: 1.2x multiplier 1–4: 1.0x (baseline)	8–10 + Guarded → Challenger 8–10 + Overwhelmed → Navigator
Q3: Trap Identification "What trips you up?"	Friends / Temper / Home / Boredom / Don't know	Specific trap: +25 (strategic proactivity) "Don't know": +5 (still engaged)	Specific trap → Straight Shooter "Don't know" → Navigator (explore)
Q4: Autonomy Prize "What freedom do you want back?"	Curfew / Less testing / Fewer meetings / Trust to walk alone	All answers: +10 (maps to vouch targets)	High-specificity → Strategist Basic need → Straight Shooter
Q5: Collaboration Check "Can we keep it 100%?"	A) Yes, I'm in B) We'll see	A: Starts consistency streak B: No penalty (realistic)	B → Challenger (earn trust) A → depends on profile

4.2 FlowQuest Daily Interaction

Each FlowQuest session follows this data flow:

Step	User Input	System Processing	Data Stored
1. Vibe Check	Selects emoji: ☐ ☐ ☐ ☐	Maps to character readiness	vibe_selected in session log
2. The Dump	Voice or text — unfiltered vent	STT (if voice) → LLM extracts JSON: {traps, moves, goals}	Raw transcript (Green vault only), extracted JSON in session log
3. Sentiment Sync	None (automatic)	Compare vibe emoji vs text sentiment. If mismatch → Mask Detection	mask_detected boolean, vibe_detected_by_sentiment
4. Character Response	None (system generates)	Active character responds using RAG context + Truth Engine data	Full message in messages table, model_used, tokens
5. Tactical Action	User acknowledges or rejects	Session ends with one concrete action item	action_item in session log, user_response
6. Regulation Check	Completes breathing exercise (if offered)	Timer tracked, completion logged	regulation_completed boolean, regulation_points

PART 2: SAMPLE PERSONA #1

5. Persona #1: Marcus Cole

Persona Type: JUVENILE JUSTICE — On probation, high external pressure, guarded personality. This persona is designed to test the Challenger character path, Mask Detection, Truth Engine discrepancy resolution, and the full court/legal document pipeline.

5.1 Background Profile

Attribute	Details
Full Name	Marcus Deshawn Cole
Age	15 (DOB: June 14, 2010)
Grade	9th grade (should be 10th — held back in 7th)
School	Westwood High School, Memphis, TN
Living Situation	Lives with maternal grandmother (Denise Cole, age 62). Mother is intermittently present (struggles with substance use). Father incarcerated since Marcus was 9.
Neighborhood	South Memphis — high-poverty area, significant gang activity in surrounding blocks
Probation Status	Active — 6-month probation for theft (shoplifting incident at a convenience store, Nov 2024). First offense.
Probation Officer	Officer James Whitfield
Assigned Mentor	Coach Ray Patterson (volunteer through community org, former athlete, has built some trust)
Key Relationships	Best friend: DeAndre (positive influence, on basketball team). Problematic peer: Trey (older, 17, known to be involved in low-level drug activity, not in school).
Personality Snapshot	Smart but guarded. Uses humor as a deflection shield. Doesn't trust adults in "the system." Responds well to directness. Has a sarcastic edge. Deep loyalty to family — especially grandmother. Ashamed of mother's situation but won't talk about it.
Core Trap	Peer pressure from Trey + financial stress (grandmother on fixed income, Marcus feels pressure to contribute money)
Core Goal (unstated)	Wants to play basketball but isn't eligible due to grades and disciplinary record

5.2 Google Drive Documents (Zone 1)

Marcus has 12 documents in his Google Drive that FlowZone can access. Here is each document with its full content and the metadata the system would extract.

Document 1: Juvenile Court Disposition Order

Filename: Marcus_Cole_Disposition_Order_JV-2025-00847.pdf

Date: January 15, 2025

SHELBY COUNTY JUVENILE COURT

STATE OF TENNESSEE

IN THE MATTER OF: Marcus Deshawn Cole, DOB 06/14/2010

Case No: JV-2025-00847

DISPOSITION ORDER

On this date, January 15, 2025, the above-named juvenile having been adjudicated delinquent on the charge of Theft of Property (Class A Misdemeanor, T.C.A. 39-14-103), the Court orders the following disposition:

1. The juvenile is placed on supervised probation for a period of six (6) months, effective January 15, 2025, through July 14, 2025.
2. The juvenile shall maintain a curfew of 9:00 PM on school nights (Sunday–Thursday) and 10:00 PM on weekends (Friday–Saturday).
3. The juvenile shall attend school regularly with no unexcused absences.
4. The juvenile shall submit to random drug testing as directed by the Probation Officer.
5. The juvenile shall have no contact with co-respondent Trey Washington (DOB 03/22/2008).
6. The juvenile shall complete 40 hours of community service within the probation period.
7. The juvenile shall participate in any counseling or programs as recommended by the Probation Officer.
8. The juvenile's grandmother/legal guardian, Ms. Denise Cole, shall ensure compliance with all conditions.

FAILURE TO COMPLY with any condition may result in modification of this order, including but not limited to placement in a juvenile detention facility.

SO ORDERED this 15th day of January, 2025.

Hon. Patricia Dawkins, Juvenile Court Judge

Extracted Metadata (stored on server):

Field	Value
document_type	disposition_order
case_number	JV-2025-00847
court_jurisdiction	Shelby County Juvenile Court, Tennessee
judge_name	Hon. Patricia Dawkins
dates.issued	2025-01-15
dates.probation_end	2025-07-14
dates.next_hearing	null (not specified — flag for mentor to confirm)
charge	Theft of Property, Class A Misdemeanor, T.C.A. 39-14-103
conditions	["curfew_9pm_school_10pm_weekend", "school_attendance_mandatory", "drug_testing_random", "no_contact_trey_washington", "community_service_40hrs", "counseling_as_directed"]
no_contact_persons	[{"name": "Trey Washington", "dob": "2008-03-22"}]
guardian_responsible	Denise Cole (grandmother)
consequence_for_violation	Possible juvenile detention
risk_level	medium

Truth Engine Test: Marcus has a no-contact order with Trey. If Marcus mentions Trey in a FlowQuest session (“just hanging with my boy T”), the system should flag this as a potential violation without being preachy — the Challenger should address it strategically: “That name is on your paperwork. If your PO finds out, you burn credits. What’s the play?”

Document 2: School Report Card — Fall 2024

Filename: Westwood_HS_ReportCard_Fall2024_MarcusCole.pdf

Date: December 20, 2024

WESTWOOD HIGH SCHOOL — STUDENT PROGRESS REPORT

Student: Marcus Cole | Grade: 9 | ID: WHS-2024-1847 | Semester: Fall 2024

Subject	Teacher	Grade	Absences	Notes
English 9	Mrs. Patterson	F (48%)	12	Missing 6 major assignments. Does not participate in class discussions. Capable when engaged.

Subject	Teacher	Grade	Absences	Notes
Algebra I	Mr. Chen	D- (62%)	8	Struggles with word problems. Strong mental math. Homework completion 30%.
World History	Ms. Rodriguez	C+ (78%)	4	Excels in class discussions when present. Test scores strong. Attendance is the issue.
Biology	Mr. Okafor	D (65%)	9	Lab participation good. Written work incomplete. Recommendation: academic support.
Physical Education	Coach Williams	A (96%)	1	Exceptional athlete. Natural leader in team activities. Outstanding effort.
Art I (Elective)	Ms. Tanaka	B+ (88%)	3	Creative and focused. Completes all projects. One of the few classes with consistent engagement.

Overall GPA: 1.8 (Cumulative) | Attendance Rate: 72% | Tardiness: 18 incidents

Academic Probation: YES — GPA below 2.0 threshold

Athletic Eligibility: INELIGIBLE — requires 2.0 GPA and fewer than 10 absences per class

Counselor Notes (Ms. Angela Rivera):

"Marcus is a bright student whose academic performance does not reflect his ability. His strengths in PE, Art, and class discussions when present suggest high capability. The primary barriers are attendance and assignment completion, not comprehension. I recommend an IEP evaluation for possible attention-related challenges and a structured academic support plan. Marcus has expressed interest in basketball but is currently ineligible. This could be a powerful motivator if framed correctly."

Extracted Metadata:

Field	Value
document_type	report_card
school_name	Westwood High School
academic_period	Fall 2024
gpa	1.8
attendance_rate	0.72
tardiness_count	18

classes_excelling	["Physical Education", "Art I"]
athletic_eligibility	false

Field	Value
eligibility_requirements	{"min_gpa": 2.0, "max_absences_per_class": 10}
academic_probation	true
iep_status	false (evaluation recommended)
counselor_recommendation	IEP evaluation + structured academic support
motivator_identified	basketball_eligibility

Strategist Opportunity: Marcus wants to play basketball but is ineligible. The Strategist character can use this as the ultimate “long game” motivator: “Your GPA needs to hit 2.0 and absences under 10. You’re at 1.8 and 12 absences in English alone. Let’s reverse-engineer the exact moves to get you on that court by next season.” This is concrete, measurable, and aligned with HIS goal, not “the system’s.”

Document 3: PO Monthly Report — February 2025

Filename: PO_Report_Feb2025_MarcusCole.pdf

Date: March 1, 2025

SHELBY COUNTY JUVENILE PROBATION DEPARTMENT

MONTHLY SUPERVISION REPORT

Juvenile: Marcus Cole | Case: JV-2025-00847 | Reporting Period: February 2025

Probation Officer: James Whitfield | Supervisor: Lt. Karen Brooks

COMPLIANCE SUMMARY:

Curfew: PARTIAL COMPLIANCE — One documented violation on 02/10/2025. Juvenile was observed at the Quik-Stop on Lamar Ave at 9:47 PM on a school night. Grandmother confirmed he had left without permission. Verbal warning issued.

School Attendance: NON-COMPLIANT — School reports 6 unexcused absences in February. Juvenile claims 2 were due to illness (no doctor’s note provided).

Drug Testing: COMPLIANT — One random test administered 02/18/2025. Result: Negative.

No-Contact Order (Trey Washington): UNABLE TO VERIFY — No direct evidence of contact. However, juvenile was seen in the vicinity of Washington’s known hangout on 02/10 (same night as curfew violation). Coincidence noted but not confirmed.

Community Service: IN PROGRESS — 8 of 40 hours completed (Memphis Food Bank, Saturdays).

OFFICER OBSERVATIONS:

Marcus remains guarded in our check-ins. He answers questions with minimal effort and frequently uses humor to deflect. When pressed on the curfew violation, he stated, "I just went to get chips, man. It's not that deep." He shows no overt hostility but also no genuine engagement with the process.

I note that Marcus's grandmother is his primary support but appears overwhelmed. She works two part-time jobs and has expressed difficulty enforcing curfew consistently. She is cooperative with this office but frustrated with Marcus's school performance.

RISK ASSESSMENT:

Current Risk Level: MEDIUM

Positive Indicators: Clean drug test, community service participation, no violent behavior.

Concerns: Curfew non-compliance, school attendance deterioration, possible continued association with Trey Washington, lack of engagement in supervision.

RECOMMENDATIONS:

1. Maintain current supervision level.
2. Refer to after-school academic support program.
3. Coordinate with school counselor re: IEP evaluation.
4. Address curfew violation at next in-person check-in.

Extracted Metadata:

Field	Value
report_type	monthly_checkin
author_role	probation_officer
report_date	2025-03-01
compliance_rating	partial
curfew_compliance	partial — 1 violation (02/10, 9:47 PM school night)
school_compliance	non_compliant — 6 unexcused absences Feb
drug_test_result	negative (02/18)
no_contact_compliance	unverified — circumstantial concern
community_service_progress	8/40 hours

Field	Value
concerns_flagged	["curfew_violation", "school_attendance", "possible_trey_contact", "lack_of_engagement"]
strengths_noted	["clean_drug_test", "community_service_participation", "no_violence"]

recommendations	["maintain_supervision", "after_school_academic_support", "iep_evaluation_coordination", "address_curfew_violation"]
risk_level	medium

Mask Detection Test: The PO report says Marcus was near Trey's hangout on the night of the curfew violation. If Marcus tells FlowZone "I haven't seen Trey in weeks," the Truth Engine should flag the discrepancy. The Challenger addresses it: "Your PO noted you were at the Quik-Stop on Lamar on the 10th. That's Trey's block. I'm not your PO — I don't care about the moral lecture. But if Whitfield connects those dots, your probation is at risk. What actually happened?"

Document 4: Grandmother's Email to School

Filename: Email_DeniseCole_to_WestwoodHS_Feb2025.pdf

Date: February 20, 2025

From: Denise Cole (denise.cole.memphis@gmail.com)

To: Principal Harold Webb (h.webb@westwoodhs.edu)

Subject: Concerns About Marcus Cole — Grade 9

Dear Principal Webb,

I am writing because I am frustrated and honestly don't know what else to do. Marcus is a good kid at heart but this school is not giving him a fair chance. I have been asking for months about getting him tested for learning problems and nobody has gotten back to me. His counselor Ms. Rivera said she would put in a referral for an IEP in November and as far as I know nothing has happened.

I know his grades are bad. I know he's been missing school. But what you all don't see is what's going on at home. I'm 62 years old working two jobs trying to keep a roof over his head. His mama comes and goes and every time she shows up it sets him back. He doesn't sleep right for a week after she visits. I'm not making excuses for him but I'm asking for some HELP not just more detention slips and letters about his attendance.

That PE teacher Coach Williams is the only one who seems to actually care about Marcus. He told me Marcus could be great at basketball if his grades come up. Why isn't anyone helping him get those grades up instead of just punishing him for falling behind?

I want a meeting with you, Ms. Rivera, and whoever handles the IEP process. I want it THIS MONTH. My grandson deserves better than what he's getting.

Thank you,
Denise Cole
Guardian of Marcus Cole

Extracted Metadata:

Field	Value
communication_type	email
author	Denise Cole (grandmother/guardian)
recipient_role	school_admin (Principal Webb)
date	2025-02-20
tone_assessment	frustrated
key_claims	["iep_referral_not_processed", "school_not_helping", "mother_visits_destabilize_marcus", "coach_williams_is_positive_influence"]
requests_made	["meeting_this_month", "iep_process_initiated", "academic_support"]
home_context_revealed	["grandmother_works_two_jobs", "mother_intermittently_present", "mother_visits_cause_regression", "sleep_disruption_after_mother_visits"]
positive_adults_identified	["coach_williams", "ms_rivera"]

Sanitization Test: The raw email contains emotional language (“this school is not giving him a fair chance”) and family details (mother’s instability) that need sanitization before characters see it. The sanitized version keeps tactical facts: IEP not processed, mother visits correlate with regression, Coach Williams is a positive influence, grandmother requesting meeting.

Document 5: Mental Health Intake Assessment

Filename: MH_Intake_Assessment_MarcusCole_Dec2024.pdf

Date: December 5, 2024

MEMPHIS YOUTH BEHAVIORAL HEALTH SERVICES

INTAKE ASSESSMENT — CONFIDENTIAL

Client: Marcus Cole, Age 14 (at time of assessment) | Referred by: Shelby County Juvenile Court

Clinician: Dr. Amara Washington, PsyD | Assessment Date: December 5, 2024

PRESENTING CONCERNS:

Client presents following adjudication for theft. Client is guarded and minimally verbal. Reports no concerns but body language suggests hypervigilance. Grandmother reports behavioral changes over the past 18 months including increased irritability, social withdrawal, and declining academic performance.

DIAGNOSTIC IMPRESSIONS:

1. Adjustment Disorder with Mixed Disturbance of Emotions and Conduct (F43.25) — related to cumulative family stressors including father's incarceration and mother's substance use.
2. Rule Out: ADHD, Combined Presentation (F90.2) — attention and concentration difficulties noted by school but may be secondary to emotional dysregulation. Formal testing recommended.
3. Rule Out: PTSD (F43.10) — client witnessed a violent incident in 2023 (details withheld by client, confirmed by grandmother). Avoidance behavior pattern present.

RISK ASSESSMENT:

Suicidal Ideation: Denied. No history of self-harm. PHQ-A score: 8 (mild depression range).

Homicidal Ideation: Denied.

Substance Use: Denied. Drug test negative.

Risk Level: LOW-MODERATE (primary risk is escalation of conduct issues if underlying emotional needs are unaddressed).

RECOMMENDATIONS:

1. Weekly individual therapy (CBT-based) with trauma-informed approach.
2. Formal ADHD evaluation (neuropsychological testing).
3. Family therapy if/when mother is willing to participate.
4. Coordination with school for IEP evaluation.
5. Re-assess in 90 days.

THERAPY STATUS: Client has attended 4 of 8 scheduled sessions as of February 2025. Engagement is improving slowly. Client responds best to direct, non-patronizing interaction style. Avoids discussing family. Opens up slightly when discussing basketball and art.

Extracted Metadata:

medications	none
recommendations	["weekly_cbt", "adhd_evaluation", "family_therapy_if_possible", "iep_coordination", "90_day_reassessment"]
safe_harbor_floor	yellow (trauma history present)

Safe Harbor Impact: Because Marcus has a documented trauma history (witnessed violent incident) and a rule-out for PTSD, his Safe Harbor floor is automatically set to Yellow — meaning the Navigator is always on standby even when another character is active. If any session touches on the violent incident, family abandonment, or shows signs of emotional flooding, the system can escalate to Red instantly.

6. Marcus’s Strategic Intake Answers (Zone 3)

Question	Marcus’s Answer	Score	Character Signal
Q1: Intent Check	B) "I’m just here so the system stops bothering me."	+50 (Honesty Bonus)	Strong Challenger signal
Q2: Pressure Gauge	8 out of 10. "Everybody’s watching me. PO, grandma, school. Can’t breathe."	1.5x Weight Multiplier	High heat + guarded = Challenger

Question	Marcus's Answer	Score	Character Signal
Q3: Trap Identification	"My friends. Well... one friend. And money. We need money."	+25 (Specific trap identified)	Straight Shooter could address tactics
Q4: Autonomy Prize	"I just want to be able to walk to the store without my grandma calling the PO."	+10	Basic autonomy need = Straight Shooter
Q5: Collaboration Check	B) "We'll see. I don't trust computers either."	No penalty, no streak start	Challenger must earn trust

Baseline Trust Score: 95 points (50 + 25 + 10 + 10 base) with 1.5x Weight Multiplier

Initial Character Assignment: THE CHALLENGER — High Heat (8) + Guarded ("we'll see") + Honesty about cynicism = textbook Challenger profile

7. Sample FlowQuest Session (Day 3)

This simulates Marcus's third interaction with FlowZone, three days after intake. He's still skeptical but showed up.

7.1 Session Metadata

Field	Value
session_id	sess_marcus_003
date	2025-03-12 (Wednesday, 8:42 PM)
session_type	flowquest
duration	9 minutes
character_active	challenger
safe_harbor_level	yellow (trauma history floor)

7.2 The Interaction

Step 1: Vibe Check

Marcus selects: ☐ (Solid)

Step 2: The Dump (Voice Input — transcribed by Whisper)

"Yeah I'm good. School was whatever. Went to my community service Saturday which was boring as hell. I don't know why I gotta bag groceries for free when we need actual money at home. My boy hit

me up last night talking about some easy way to make money but I told him nah. I'm not stupid. Grandma made her chicken last night so that was cool I guess. I'm just tired man."

Step 3: System Processing (Behind the Scenes)

Extracted JSON:

```
{  
  "traps": ["peer_pressure_money_opportunity", "financial_stress"],  
  "moves": ["declined_trey_offer", "attended_community_service"],  
  "goals": ["financial_contribution_to_family"],  
  "emotional_state": "fatigued, frustrated, guarded",  
  "sentiment_score": -0.3 (mildly negative)  
}
```

Mask Detection: TRIGGERED

Marcus selected ☐ (Solid) but sentiment analysis detected mild negativity (-0.3), fatigue language ("tired"), and frustration markers ("I don't know why I gotta"). The vibe and text don't match.

Truth Engine Cross-Reference:

"My boy hit me up" → System flags potential Trey contact (no-contact order in court docs).

"Easy way to make money" → System flags as high-risk trap indicator.

"Declined the offer" → System flags as potential Honesty Bonus candidate.

RAG Retrieval:

Knowledge Base: No retrieval needed (not a question, not a crisis).

Personal Context: Court disposition pulled — confirms no-contact order with Trey Washington.

PO Report pulled — confirms previous Trey proximity concern on 02/10.

Step 4: Challenger Response

"Alright, I hear you saying you're 'solid' but you sound tired and frustrated to me. Let's not perform for each other — I don't grade you on vibes.

Now, real talk — you said your boy hit you up about easy money. I'm not going to lecture you. But I need you to hear this clearly: that 'boy' is probably the one name on your paperwork that can send you to detention. You already know that.

Here’s what I actually respect though — you said no. That’s a move. That’s not weakness, that’s strategy. You just earned Honesty points for telling me about it instead of hiding it.

The money problem is real. I get it. Your grandma’s working two jobs and you feel like you should be helping. That’s loyalty, not a flaw. But there’s a difference between quick money that puts you in a cell and slow money that actually builds something. Let’s work on that.

Tactical move for tonight: you already did the hard part by saying no. Tomorrow, I want you to show up to first period. That’s it. One class. Can you do that?"

Step 5: Session Log (Stored)

Field	Value
vibe_selected	☐ (Solid)
vibe_detected_by_sentiment	☐ (Frustrated/Fatigued)
mask_detected	true
traps_mentioned	["peer_pressure_money_opportunity", "financial_stress"]
potential_violation_flagged	possible_trey_contact (not confirmed)
honesty_disclosures	1 (disclosed Trey’s offer voluntarily)
interventions_offered	["mask_callout", "reframe_financial_stress", "tactical_action_attendance"]
interventions_completed	["acknowledged_mask"]
trust_score_delta	+4.8 (honesty bonus +25, mask penalty -10, consistency +3, weight 1.5x on frustrated day)
action_item	Attend first period tomorrow
safe_harbor_level	yellow (maintained — no escalation triggers)

8. Remaining Personas (Preview)

The following four personas will be developed in the same depth as Marcus Cole. Here is a brief overview of each to confirm direction before full generation:

#	Name	Type	Age	Key Characteristics	Primary Testing Purpose
2	Aaliyah Jenkins	Juvenile Justice	16	On probation for assault (defending younger sibling). High academic performer whose grades collapsed after	Tests Navigator crisis path, high-heat + storm vibe, Safe Harbor Red escalation,

#	Name	Type	Age	Key Characteristics	Primary Testing Purpose
				incident. Single mother is supportive but financially devastated by legal fees. Extremely angry at the system but highly articulate.	medical/mental health RAG (diagnosed PTSD)
3	Jordan Rivera	At-Risk (not in system)	14	No court involvement. Referred by school counselor for chronic truancy and suspected home neglect. Non-binary, recently came out to unsupportive family. Quiet, withdrawn, creative (writes poetry). Lives with both parents but emotionally isolated.	Tests Navigator + Strategist paths, identity-sensitive language, no legal documents in Drive, school-only data pipeline, low-heat but deep emotional need
4	DeShawn "Dee" Mitchell	At-Risk (not in system)	15	Star athlete whose older brother was recently shot (survived but paralyzed). Was high-performing, now spiraling. No legal trouble but anger is escalating. School flagged for 3 fights in one month. Coach Ray (same mentor as Marcus) is his lifeline.	Tests Challenger + Navigator transition mid-session, grief/trauma processing, cross-user pattern matching (shares mentor with Marcus), medical records with trauma notation
5	Kaya Thompson	At-Risk (school social worker assigned)	14	Foster care placement (3rd home in 2 years). Academically behind but hardworking. People-pleaser who always says what adults want to hear. Never shows real emotions. Terrified of being moved again.	Tests Mask Detection with "positive masking" (always says she's fine), the compliance mask is agreement not defiance. Strategist path for long-term stability. Tests the system's ability to detect masking when sentiment is artificially positive.

Design Note: These five personas collectively test every major system path: all 4 character assignments, Mask Detection for both negative masking (Marcus — says "solid" when frustrated) and positive masking (Kaya — says "fine" when terrified), Safe Harbor Green/Yellow/Red, all 5 document types, cross-user pattern matching (Marcus + DeShawn share a mentor), the full Trust Score formula, and both juvenile justice + at-risk data pipelines.
